Current Prices as defined by SEC regulations in effect 12-31-2009, as set out in Definition 22. (v)
 "Existing economic conditions include prices and costs at which economic producibility from a reservoir is to be determined. The price shall be the average price during the 12-month period prior to the ending date of the period covered by the report, determined as an unweighted arithmetic average of the first-day-of-the-month price for each month within such period, unless prices are defined by contractual arrangements, excluding escalations based upon future conditions."

Note: Dates are the last date in which posted/spot/futures prices were set forth on or before the first day of the month. (For example, Plains posted prices on 12/30/11 and did not change their postings until 1/03/12, which means that the 12/30/11 posting was in effect for 1/01/12.)

(1) As of Monday, August 5, 2013, the Wall Street Journal discontinued publishing the WTI crude oil spot price. Therefore, we are now using Bloomberg's WTI crude oil spot price, as shown here for 2012 and 2013. Bloomberg's WTI crude oil price has historically matched very closely to WSJ's.

(2) These prices are shown for reference purposes only. Previous SEC guidance has indicated that "The staff believes that the year-end price contemplated by paragraph 30a of SFAS 69 is the ... daily posted oil price or daily gas sales price ("spot price") adjusted for oilfield, or gas gathering hub and wellhead price differences (e.g., grade, transportation, gravity, sulfur and BS&W), as appropriate. ... The staff has objected to each of the following measures as a proxy for the year-end price under paragraph 30a of SFAS 69: ... 4. the NYMEX futures price."

Current Prices as defined by SEC regulations in effect 12-31-2009, as set out in Definition 22. (v)

"Existing economic conditions include prices and costs at which economic producibility from a reservoir is to be determined. The price shall be the average price during the 12-month period prior to the ending date of the period covered by the report, determined as an unweighted arithmetic average of the first-day-of-the-month price for each month within such period, unless prices are defined by contractual arrangements, excluding escalations based upon future conditions."

Note: Dates for the Gas Daily spot prices are the "flow date" on the first of each month, whereas dates for other prices are the last date in which posted/spot/futures prices were set forth on or before the first day of the month. (For example, NYMEX futures prices last traded on 12/30/11, and did not trade again until 1/03/12).

⁽¹⁾ These prices are shown for reference purposes only. Previous SEC guidance has indicated that "The staff believes that the year-end price contemplated by paragraph 30a of SFAS 69 is the ... daily posted oil price or daily gas sales price ("spot price") adjusted for oilfield, or gas gathering hub and wellhead price differences (e.g., grade, transportation, gravity, sulfur and BS&W), as appropriate. ... The staff has objected to each of the following measures as a proxy for the year-end price under paragraph 30a of SFAS 69: ... 4. the NYMEX futures price."
